Daniel Brooks
Data Engineer
daniel.brooks@example.com | Chicago, IL

Summary
Data engineer with four years of experience building pipelines for retail and logistics teams. I work mostly in Python and SQL, and I care about data that arrives on time and adds up.

Experience
Data Engineer, Logistics company (2023 to now)
- Built Airflow pipelines that load shipment events from Kafka into Snowflake every five minutes.
- Wrote data quality checks that catch missing or duplicated orders before reports go out.
- Cut the nightly warehouse load from three hours to forty minutes.

Analytics Engineer, Online retailer (2021 to 2023)
- Modeled sales and inventory data in dbt and SQL for the finance team.
- Built dashboards in Looker for weekly stock planning.

Skills
Python, SQL, Airflow, dbt, Kafka, Snowflake, PostgreSQL, Docker, Looker. No Go or production backend service experience yet.

Education
B.S. Statistics, 2021
